

OrganaBud

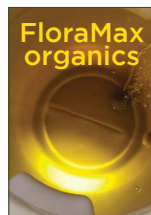

Improves Plant Structure and Fruit Quality

- Promotes shortening, branching, bud sites and stacking
- Increases potency, terpene profile and pistil vibrancy
- Will NOT cause biofilms, blockages, foaming or odors
- 7 year plus shelf life ensures reliability
- Dosage: 2ml/L (8ml/Gal) from seed to harvest.
- Available in: 250ml // 1L // 5L // 20L // 1000L

CAUTION: Organic additive – NEVER use in conjunction with chlorines or peroxides.

“Purified extracted organics” explained

The chemists at FloraMax have been able to deconstruct popular organic ingredients such as kelp and fulvic acid, then isolate specific ‘beneficial’ organic molecules. These are then incorporated into our additives in a purified and potent form. Importantly, this enables their concentrations to be optimized for maximum nutrient effect, without been hindered by any nuisance chemicals. The result is a range of products that produce unique and tangible results without causing problems such as blocked drippers and pH fluctuation.

FloraMax's organics run extremely clean (R).

TESTIMONIALS

“

“OrganaBud promotes more branching, shortening, bud sites and stacking. Its impact is obvious within a few weeks of use.”

“OrganaBud is providing more bud sites and tighter internodal spacing...more vibrant colours in the pistils, improved aroma and the impression of a fuller, more complete terpene profile...”

“OrganaBud is very clean in the reservoir and there are no bad odours. Other kelp products make a huge mess in the res, lines and drippers”
