

# FloraMaX

## Veg-1

1-part Base Nutrient – Just ONE Bottle for Veg and Bloom

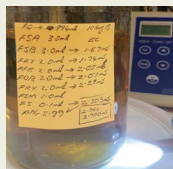

- **Single-bottle that performs flawlessly during both veg AND bloom** in hydro, coco and soil – No “cal-mag” required even with coco or RO waters
- **Greater pH stability than most 2-parts** – adjustment is rarely required in soil and coco
- **Provides superior transition to flower compared to 2-part formulations**
- **Ideal for hard waters** – avoids blocked drippers and buildup
- **Very soluble and clean** and provides longer reservoir stability
- **Ideal for auto-dosers**
- **Contains premium grade ingredients** including chelated trace metals
- **No tedious dosing procedures** – simply measure, pour, & stir
- **Dosage:** 3.5 - 7 ml/L (13-26 ml/Gal) | Available in: 1L // 5L // 20L // 1000L

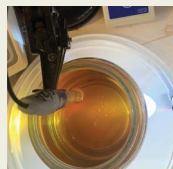

Rapid veg growth without a cal-mag or any nitrogen supplements. @hydropacific, California

Thick af. No cal-mag. @55hydro, California

Aug 19 FloraMax test batch with all additives (EC 2.3). Original pH 5.99 and now 6.47 after 19-months. There's minimal deposit on bottom of jar and nil slimes. @floramaxlab

## TESTIMONIALS

“...amazing yield and taste, 100% perfectly healthy plants. Very simple and clean. The Veg-1 range is the key to bigger yields!”

“Growing is so much easier, not to mention LESS CLUTTERED, now that we only need a single nutrient bottle all the way through”
