

FloraMaX

VegaFlora A+B

Professional 2-part Nutrient for Commercial Cropping

- **Single AB formula that performs flawlessly during both veg AND bloom** in hydro, coco and soil — No “cal-mag” required even with coco or RO waters
- **Enhanced pH stability** — adjustment is rarely required in soil and coco
- **Ideal for hard waters** — helps avoid blocked drippers and system buildup
- **Very soluble and clean** and provides longer reservoir stability
- **Ideal for auto-dosers**
- **Contains premium grade ingredients** including chelated trace metals
- **No tedious dosing procedures**— simply measure, pour, & stir
- **Dosage** 1.7-3.0ml/L (6-11ml/Gal) | Available in: 1L // 5L // 20L

TESTIMONIALS

Rapid veg growth without a cal-mag or any nitrogen supplements. @hydropacific, California

Thick af. No cal-mag. @55hydro, California

Aug 19 FloraMax test batch with all additives (EC 2.3). Original pH 5.99 and now 6.47 after 19-months. There's minimal deposit on bottom of jar and nil slimes. @floramaxlab
